Jordi Català Amat

Senior Software Engineer · C#/.NET

jordi@jordiamat.com · +34 611 144 170 · jordiamat.com · linkedin.com/in/byjordiamat · github.com/jcatalaamat

Mexico · UTC-6 · Remote · EU citizen, UK settled status

01 / PROFILE

C#/.NET engineer with 13 years on backends, from event-sourced delivery and tax systems at MRW and PwC to an Entity Framework Core and GraphQL domain layer for a London events SaaS (2023 to 2025). I work directly with CTOs on remote teams, ship behind feature flags with per-role API tests, and build the React front end when the job needs it. I use Claude Code daily on my own production services.

02 / SKILLS

Backend	C# / .NET · ASP.NET Web API & MVC · Entity Framework Core · GraphQL · REST
Architecture	Event sourcing · CQRS · DDD · SOA / ESB · RabbitMQ · Google Pub/Sub
Data	SQL Server · PostgreSQL · MongoDB
Practices	TDD · API testing · feature flags · CI/CD (TeamCity, CircleCI, Fastlane)
Front end	React · React Native · JavaScript · TypeScript
Also	AWS · Docker · Node.js · Python · Django · Claude Code

03 / EXPERIENCE

Jul '26 – Present

Aldea Events · live · aldea.events

Independent Software Engineer

WhatsApp events platform · Claude vision, Node.js, Railway

Jan '26 – Jun '26

Sherppi · live · sherppi.app

Founding Engineer — equity-based

Tourism-tech · Barcelona, Spain · Remote

Took an audio-tour startup to production: React web app and Django backend with AI recommendations, geolocation-verified tours, Stripe payments, Spanish and English. Delivered with Claude Code agents.

Mar '25 – Dec '25

Family, travel and personal development

Career break

Mexico

Time with my family and travel. Kept my skills current on personal projects, building and running my own services on Linux with Claude Code agents.

Sep '23 – Feb '25

Hostology · live · hostology.co.uk

Software Engineer — Contract

SaaS event management · London, UK · Remote

- Worked directly with the CTO and founders in a lean team, building from the CEO's specs and Figma.
- Built features in the **C#/.NET** domain layer on **Entity Framework Core**: LINQ query objects for itinerary menus and food allocations, with V1 and V2 query paths rolled out behind feature flags.
- Replaced a convoluted TypeScript-to-.NET **GraphQL** layer with a new .NET one, migrated piece by piece (incl. document and PDF endpoints), and rebuilt the guest portal on it.
- Split a monolith serving five user groups into portals, cutting CI time 70–80%. Per-role API tests (claims-based). **AWS**: replicas, environments, deployments, secrets.

Aug '20 – Aug '23

Family and health

Career break

Spain

A personal break through the pandemic, for family and health. Moved to Mexico in 2023.

Feb '20 – Jul '20

Tinto

Software Engineer — Contract

Parenting app · London, UK · Remote

The only in-house engineer at an early-stage app for mothers. Brought it in-house from an agency, moved hosting from Bluehost to **AWS** with no hard cut-over, set up CI/CD with Fastlane, and hired and mentored an intern.

2019

Just Insurance live · just.insure

Frontend Engineer — Contract

Insurtech · London, UK

React Native pay-per-mile insurance apps, with GPS tracking, crash analytics and CI/CD through App Store and Play Store releases.

Jan '18 – Nov '18

Movebubble

Software Engineer — Contract

Property-tech · London, UK

Returned as a contractor twice in 2018.

Apr '16 – Jul '17

1y 3mo

Movebubble

Software Engineer — Full-time

Property-tech · London, UK

Backend development in **C#**, then full stack with **React** and **React Native**. Worked on the Renter web app and the Negotiator app for agents, and took the Negotiator app from prototype to a fully functioning cross-platform mobile app in both stores. Grew into frontend lead and cut releases to minutes with a new deployment pipeline.

Dec '14 – Apr '16

1y 5mo

PricewaterhouseCoopers

Software Developer — Full-time

Enterprise · London, UK

- Designed and built **C# ASP.NET Web APIs** for enterprise tax systems used by internal and external users.
- When tax season overloaded processing, proposed and led an **ESB/SOA** design with EventSourcing and **RabbitMQ** to process files in parallel, improving file-processing performance.
- Built an employee-tracking application on AngularJS, Web API, Entity Framework and SQL Server.
- Established a CI pipeline with quality gates and automated deployments.

2013 – 2014

MRW

Software Developer — Full-time

Logistics · Barcelona, Spain

Built the new version of a package-delivery management system (Spain, Portugal, Venezuela) in **C# ASP.NET MVC** with SOA, EventSourcing and CQRS, using Domain-Driven Design and TDD.

04 / WHAT THEY SAY

> "I have worked with Jordi twice — both at Movebubble and then I later hired him into the team at Hostology. Jordi has a get-things-done mentality that is a great fit in a fast-paced environment."
>
> **Mark Somerfield**, CTO, Hostology

> "In a very short time he took the Movebubble Agent App from a prototype to a fully functioning, cross-platform, mobile App — now a vital part of the business."
>
> **Tom Allen**, Technical Lead, NEVERBLAND (formerly Movebubble)

05 / EDUCATION

BSc Computer Software Engineering, UPC Barcelona School of Informatics (FIB), 2009 to 2013. Catalan and Spanish native, English fluent.
